

# Codeium's Varun Mohan and Jeff Wang on Unleashing the Power of AI in Software Development

Author: Brian Caulfield

The world increasingly runs on code.

Accelerating the work of those who create that code will boost their productivity — and that's just what AI startup Codeium, a member of NVIDIA's Inception program for startups, aims to do.

On the latest episode of NVIDIA's AI Podcast , host Noah Kravitz interviewed Codeium founder and CEO Varun Mohan and Jeff Wang, the company's head of business, about the company's business, about how AI is transforming software.

Codeium's AI-powered code acceleration toolkit boasts three core features: autocomplete, chat and search.

Autocomplete intelligently suggests code segments, saving developers time by minimizing the need for writing boilerplate or unit tests.

At the same time the chat function empowers developers to rework or even create code with natural language queries, enhancing their coding efficiency while providing searchable context on the entire code base.

Noah spoke with Mohan and Wang about the future of software development with AI, and the continued, essential role of humans in the process.

Jules Anh Tuan Nguyen Explains How AI Lets Amputee Control Prosthetic Hand, Video Games

A postdoctoral researcher at the University of Minnesota discusses his efforts to allow amputees to control their prosthetic limb — right down to the finger motions — with their minds.

Overjet's Ai Wardah Inam on Bringing AI to Dentistry

Overjet, a member of NVIDIA Inception , is moving fast to bring AI to dentists' offices. Dr. Wardah Inam, CEO of the company, discusses using AI to improve patient care.

Immunai CTO and Co-Founder Luis Voloch on Using Deep Learning to Develop New Drugs

Luis Voloch, co-founder and chief technology officer of Immunai, talks about tackling the challenges of the immune system with a machine learning and data science mindset.
