

11 Essential Explainers to Keep You in the Know in 2023

Author: Brian Caulfield

The NVIDIA corporate blog has long been a go-to source for information on the latest developments in AI and accelerated computing.

The blog's series of " explainers " are among our most-read posts, offering a quick way to catch up on the newest technologies.

In this post, we've rounded up 11 of the most popular explainers from the blog, providing a beginner's guide to understanding the concepts and applications of these cutting-edge technologies.

From AI models to quantum computing, these explainers are a must-read for anyone looking to stay informed on the latest tech developments in 2022.

Let us know in the comments section below which AI and accelerated computing concepts you'd like explained next on our blog. We're always looking for suggestions and feedback.
