

GeForce NOW Gets Wild, With ‘Party Animals’ Leading 24 New Games in September

Plus, a new GeForce NOW membership offer is now available for all Chromebook owners.

Author: GeForce NOW Community

Just like that, summer falls into September, and some of the most anticipated games of the year, like the Cyberpunk 2077: Phantom Liberty expansion , PAYDAY 3 and Party Animals , are dropping into the GeForce NOW library at launch this month.

They're part of 24 new games hitting the cloud gaming service in September. And the next Game Pass title to join the cloud at launch is Sea of Stars, part of 13 new games this week.

Keep an eye on GFN Thursday to see the next Microsoft titles joining the cloud this month, including Quake II , Gears Tactics and Halo Infinite.

Plus, NVIDIA has worked with Google to give Chromebook owners a new offer that includes three free months of a GeForce NOW Priority membership. GeForce NOW cloud gaming goes perfectly together with Chromebooks, which provide up to 1,600p resolution and 120Hz+ displays.

Make painfully great memories with friends in Party Animals , a hilarious, physics-based party brawler from Recreate Games and Source Technology. Fight friends as adorable puppies, mischievous kittens, magical unicorns or other fuzzy creatures or terrorize them as fearsome sharks and ferocious dinosaurs to be the last one standing.

Battle it out by picking up an assortment of weapons to get an edge over others or punch, toss, jump, kick and headbutt others in the brawl. Bring the action across multiple game modes — each requires a different strategy to win.

Get fierce for party game night, whether playing with friends locally on the couch or across devices online. Party Animals joins the cloud at launch on Thursday, Sept. 21.

One of the best ways to stream games from GeForce NOW is with the new Cloud Gaming Chromebooks , which feature screens that display beautiful scenes at up to 1,600p and 120Hz+.

Chromebook gamers can jump right into 100+ free-to-play titles and over 1,600 hit games, like Baldur's Gate 3 , Remnant II , supported games from the Xbox PC Game Pass library and more. GeForce NOW Priority members can also explore the worlds of Cyberpunk 2077 , Control and other titles with RTX ON , and Ultimate members can level up and access new NVIDIA technologies like DLSS 3.5 in upcoming games like Alan Wake 2 and Portal with RTX . Compete online with ultra-low latency and other features perfect for playing.

Starting today, Google and NVIDIA are offering all Chromebook owners three free months of a GeForce NOW Priority membership to get gamers started. And those interested in leveling up to an Ultimate membership, the highest-performing tier, are already able to get three free months of a GeForce NOW Ultimate membership with the purchase of a Cloud Gaming Chromebook. Find more details on how to redeem the offer in Google's Keyword blog or on the Chromebooks Perks page .

New games come with each GFN Thursday, and this week's batch includes Sea of Stars from Sabotage Studio. A retro-inspired role-playing game drawing from classics like Chrono Trigger , it features a vibrant world, a dynamic combat system and a story of cosmic proportions. Play as two Children of the Solstice, who combine the powers of the sun and moon to perform Eclipse Magic, the only force capable of fending off the monstrous creations of an evil alchemist known as the Fleshmancer. Sea of Stars is now available for members to stream from the cloud via Game Pass or

Steam.

Check out the list of 13 new games joining this week:
