

Welcome to the Family: GeForce NOW, Capcom Bring 'Resident Evil' Titles to the Cloud

Capcom titles lead nine new games this week alongside new RTX 4080 servers in Miami, Portland and Stockholm.

Author: GeForce NOW Community

Horror descends from the cloud this GFN Thursday with the arrival of publisher Capcom's iconic Resident Evil series.

They're part of nine new games expanding the GeForce NOW library of over 1,600 titles.

RTX 4080 SuperPODs are now live in Miami, Portland, Ore., and Stockholm. Follow along with the server rollout process, and make the Ultimate upgrade for unbeatable cloud gaming performance.

The Resident Evil series makes its debut on GeForce NOW with Resident Evil 2 , Resident Evil 3 and Resident Evil 7 Biohazard .

Survive against hordes of flesh-eating zombies and other bio-organic creatures created by the sinister Umbrella Corporation in these celebrated — and terrifying — Resident Evil games. The survival horror games feature memorable casts of characters and gripping storylines to keep members glued to their seats.

With RTX ON and high dynamic range, Ultimate and Priority members will also experience the most realistic lighting and deepest shadows. Bonus points for streaming with the lights off for an even more immersive experience.

The Resident Evil titles lead nine new games joining the GeForce NOW library:

Shadows of Doubt (New release on Steam , April 24)

Afterimage (New release on Steam , April 24)

Roots of Pacha (New release on Steam , April 25)

Bramble: The Mountain King (New release on Steam , April 27)

The Swordsmen X: Survival (New release on Steam , April 27)

Poker Club (Free on Epic Games Store , April 27)

Resident Evil 2 (Steam)

Resident Evil 3 (Steam)

Resident Evil 7 Biohazard (Steam)

Best zombie fighting weapon. Go.
